We have been contracted by the Management of this building to provide a pesticide application to your suite for the elimination of **ANTS**. The insecticide being used is **IMIDACLOPRID 21.0% & BETA-CYFLUTHRIN 10.5% (TEMPRID SC) PCP#32524**

As there may be a health hazard involved during the application of the pesticide, we require that you vacate your suite from _____ to _____ on _____ **2026** We ask your co-operation in carrying out the following instructions prior to the vacate time shown above.

Remove all items from the lower cupboards and place them on the counter tops or kitchen table, then cover with plastic, sheets or blankets.

Move furniture in all rooms at least 1 foot away from the walls, to enable treatment to be applied to the baseboard perimeters.

Remove all items from the floor area of clothes closets, linen cupboards, broom and storage closets, to allow access to the baseboard perimeters. The items removed can be placed on the beds or on the floor, in the center of a room, and they do not need to be covered. All items from bathroom vanities must also be removed.

All pets must be taken out of the building for the time period indicated above. Fish tanks (if any) should have their pumps shut off and the tank openings sealed with a plastic covering.

On re-entry to your suite, no wash-up is required. However, a non-adhesive shelving paper or paper towel must be placed in the lower kitchen cupboards, before returning any items.

If you require medical information, please contact Poison Control Center at 1-800-332-1414. For chemical information, please contact Edmonton Exterminators Ltd

*Any cancellations made with less than 48 hours notice or in the event that the service provided is deemed unproductive will result in a \$30 fee to be charged per unit
